TECH SKILLS

- Python core
- Python web
- Data Science
- Data Analytics
- TensorFlow
- Keras
- Sci-kit Learn
- Pandas
- NumPy
- Docker
- Stable Diffusion
- Suno / ElevenLabs / Voicemaker
- AI Content Generation
- YouTube API
- Spotify for Artists
- CapCut (відеомонтаж)
- face_recognition
- GPT-4 API
- Multimedia Automation
- SQL (SQLite, PostgreSQL)
- noSQL (Redis, MongoDB)
- Django
- Flask
- Aiohttp
- Remote API
- PyDoc
- Unit Test
- Git
- Scrum
- Agile

SOFT SKILLS

- Strategic thinking
- Team management
- Effectiveness in negotiations
- Communication skills
- Determination and independence
- Effectiveness in time management

LANGUAGES

- English - Intermediate
- Ukrainian - Native

SUMMARY

I am Anton Babenko — Full Stack Developer with a strong focus on AI-powered content and automation. After graduating from IT-Step and GoIT academies, I mastered both Front-End (HTML5, CSS, JavaScript, React) and Back-End (Python, Django, Flask, PostgreSQL, SQLite) development.

Beyond the code, I lead creative AI projects that combine machine learning, media production, and automation — from building 24/7 streaming channels and voice-generated fairy tales to integrating Stable Diffusion and GPT-based APIs.

Previously, I managed a construction company, where I honed my strategic thinking and leadership skills. Today, I apply that mindset to build digital solutions that inspire, inform, and scale.

My mission is to blend technology with creativity — turning every line of code into a meaningful experience and every project into a story that resonates.

PROJECT EXPERIENCE

Personal project of creating a site to order:
- Project name: CREATORS_Personal_assistant - Mobile application
  Duties: Full Stack   Technologies: HTML, JavaScript, CSS, Python, Django, VS Code, kvlang, git, Agile
- Project name: EnigmaDent - Website
  Duties: Full Stack Developer   Technologies: HTML, JavaScript, CSS, Python, Django
- Project name: BoB's Projects – AI-based Multimedia Platform   BoB's Fairy Tales & BoB's Tune Hub
  Duties: Solo Developer, Content Creator
  Technologies: Python, Django, Stable Diffusion, Suno, HailuoAI, ElevenLabs, CapCut, YouTube API, Spotify for Artists, DistroKid
  Description: Launched AI-driven projects with original music and fairy tales, videos+, views+, subsc..

Group Project:
- Project name: FinalProjectGoitWeb - Personal assistant (Web application)
  Duties: Team Lead
  Technologies: HTML, JavaScript, CSS, Python, Django, Koyeb, Amazon S3, PostgreSQL, Trello, VSC
- Project name: FinalProjectGoitDataScience- Image Classification Web Service
  Duties: Team Lead
  Technologies: HTML, JavaScript, CSS, Python, Django, Docker, Bootstrap, GPT-4 API, Koyeb, Pillow, (PIL), face_recognition, PostgreSQL, Convolutional Neural Networks (CNN)

WORK EXPERIENCE

Director and owner at ANMA-electric
February 2020 - May 2024

Construction company, direction of electrical installation.

- I define and implement strategies for the success of the company, ensuring optimal management and promoting the implementation of effective solutions.

Senior electrical engineer of the CLS
January 2010 - February 2013

South-Western Railway of Ukraine

- Ensured the reliable operation of the power plant and intervened in emergency situations. Maintenance and technical inspection of equipment, cooperation with other specialists and ensuring the safety of electrical systems.

EDUCATION

\WOOLF/
Master's Degree of Computer Science: Data Science & Data Analytics
March 2024 - March 2026

IT School GoIT
Python: Project Manager, Project Management
December 2024 - January 2025

IT School GoIT
Python: Full Stack Developer
September 2023 - July 2024

IT STEP Academy
Python: Web Developer
February 2023 - August 2023

Ukrainian State University of Railway Transport
Master's degree: Automation and automation in transport
September 2000 - August 2005
